2007	x	x	x	x	x	x	x	x	x	x	x	x	
2008	x	x	x	x	x	x	x	x	x	x	x	x	

(Note: precise quantity per month is not known. An "x" indicates months water was used.)

E. **Purpose of Use** - Specify number of acres irrigated, stock watered, persons served, etc.

Irrigation \_\_\_\_\_ acres; Stockwatering \_\_\_\_\_; Domestic \_\_\_\_\_

Other (specify) Consumptive water use occurs on approx. 1000 acres and, for the 06-08 period, comprised of approx. 350 acres of row crops (corn & wheat) and approx. 650 acres of managed and natural waterfowl/wildlife habitat.

F. **Changes in Method of Diversion** - Describe any changes in your project since your previous statement was filed.  
(New pump, enlarged diversion dam, location of diversion, etc.)

G. Please answer only those questions below which are applicable to your project.

1. Conservation of water

a. Are you now employing water conservation efforts? YES ☒ NO ☐  
Describe any water conservation efforts you have initiated: Good water/farming practices, excess water is pumped back into channels.

b. If you are claiming credit for water conservation under section 1011 of the Water Code for your claimed pre-1914 appropriative right, please show the amount of water conserved:

Reduction in Diversions:

Year \_\_\_\_\_ (AF/MG) Year \_\_\_\_\_ (AF/MG) Year \_\_\_\_\_ (AF/MG)

*EW rrm/lem  
9/25/09*

Reduction in consumptive use:

Year \_\_\_\_\_ (AF/MG) Year \_\_\_\_\_ (AF/MG) Year \_\_\_\_\_ (AF/MG)

I have data to support the above surface water use reductions due to conservation efforts. YES \_\_\_\_\_ NO \_\_\_\_\_

## 2. Water quality and wastewater reclamation

- a. Are you now or have you been using reclaimed water from a wastewater treatment facility, desalination facility or water polluted by waste to a degree which unreasonably affects such water for other beneficial uses? YES \_\_\_\_\_ NO X  
However, Delta waters are in significant part discharges from such facilities.
- b. If you are claiming credit due to the substitution of reclaimed water, desalinated water or polluted water in lieu of a claimed pre-1914 appropriative right under section 1010 of the Water Code, please show amounts of reduced diversions and amounts of substitute water supply used:

Amount of reduced diversion:

Year \_\_\_\_\_ (AF/MG) Year \_\_\_\_\_ (AF/MG) Year \_\_\_\_\_ (AF/MG)

State the type of substitute water supply: \_\_\_\_\_

Amount of substitute water supply used:

Year \_\_\_\_\_ (AF/MG) Year \_\_\_\_\_ (AF/MG) Year \_\_\_\_\_ (AF/MG)

I have data to support the above surface water use reductions due to the use of a substitute water supply. YES \_\_\_\_\_ NO \_\_\_\_\_

3. Conjunctive use of surface water and groundwater (Note: the groundwater table is very high and seepage from the surface channels is constant. Crops and vegetation can and often do obtain water from both sources.
- a. Are you now using groundwater in lieu of surface water? YES \_\_\_\_\_ NO \_\_\_\_\_

- b. If you are claiming credit due to the substitution of groundwater for a claimed pre-1914 appropriative right under section 1011.5 of the Water Code, please show the amounts of groundwater used:

Year \_\_\_\_\_ (AF/MG) Year \_\_\_\_\_ (AF/MG) Year \_\_\_\_\_ (AF/MG)

I have data to support the above surface water use reductions due to the use of groundwater. YES \_\_\_\_\_ NO \_\_\_\_\_

I understand that it may be necessary to document the water savings claimed in "F" above if credit under Water Code sections 1010 and 1011 is sought in the future.

I declare that the information in this report is true to the best of my knowledge and belief.

ITEM If there is insufficient space for your answers, please use the space provided below or add an attachment sheet.

D Consumptive use of water on the property at issue can occur at all  
times of the year depending on the crops and the climate. Water  
consumed by plants is a combination of applied water, rainfall &  
seepage water/shallow groundwater (i.e., sub-irrigation).

## GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. After the formation of the California Water Commission back on December 19, 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

## ATTACHMENT TO STATEMENT OF WATER DIVERSION AND USE

I believe the property at issue (hereinafter "Property") has riparian, pre-1914, overlying and statutory water rights.

To the extent the Property is alleged to have been physically separated from the surface waters of a neighboring channel, I believe that at, and since, the time of said alleged separation the intent of the landowners in the chain of title was to always preserve the original riparian rights.

The groundwater under the Property is in direct connection with the waters of the neighboring channel(s) and I believe this connection preserves a riparian right to the Property. Moreover, I believe said connection affords the right to divert from such channels within the scope of the landowner's "overlying rights" to the common surface/groundwater supply.

The construction of the levees around the Island on which the Property is situated did not constitute a forfeiture of the riparian or pre-1914 rights on the Property. Leveeing the land was a method of protecting it from periodic inundation, and was not done to sever the ability to divert water. The reclaimed land was intended for agricultural use which needs and is benefitted by water.

The Island on which the Property is situated was previously served by numerous inner-island channels which provided water to many if not all the lands. The water was provided by both surface supply, and by subsurface seepage from the surface waters. To the extent these connections to the surrounding channels were no longer used, they were no longer used only when alternative methods of supply were developed, thus indicating the diverters'/landowners' intent to maintain pre-existing riparian and/or pre-1914 water rights.

The Property and the surrounding area were originally designated "swamp and overflowed lands" and, as such, always had a supply of water under "natural" conditions. The reclamation of these lands always included the intent to retain the ability to receive/divert water from the neighboring channels and thus preserve pre-existing water rights. I believe that since the Property was formally classified as swamp and overflowed lands and is subject to high water tables and overflow that the present consumptive use results in a significant savings of water in comparison to discontinued use for farming. Moreover, because of the constant seepage from the surface channels into the shallow groundwater, the Island's ongoing pumping of that seepage back into the surface channels also results in substantial savings of water that would otherwise fill up the island and be subject to substantial evaporative losses.

Water Code Sections 11460 et. seq. (the area of origin statutes) provide a statutory water right for all lands within the Delta. Only the issue of payment (to the USBR and/or DWR) remains to be determined/resolved. The water in the Delta is connected to the Bay and ocean and is tidal and, hence, unlimited in supply. Since the USBR's Central Valley Project and DWR's State Water Project are obligated to provide salinity control, there should be no obligation for payment (neither for water quality nor quantity).

The above is merely a summary of the other factual and legal arguments which are believed to support claims of riparian, pre-1914, overlying and statutory rights. If the information submitted herewith to support such rights is deemed insufficient by the SWRCB or others, I reserve the right to provide additional information in support of these other assertions.

#### GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

## GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the source of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

"Statements of Water Diversion and Use"

"Information Pertaining to Water Rights in California"

"Water Rights for Stockponds Constructed Prior to 1969"

"Appropriation of Water in California"

IF NAME/ADDRESS/PHONE NO. IS WRONG OR MISSING, PLEASE CORRECT.

SOURCE: SAN JOAQUIN RIVER

TRIBUTARY TO: SUISUN BAY

COUNTY: SAN JOAQUIN

YEAR OF FIRST USE: 1850

DIVERSION

WITHIN: NE1/4 OF NW1/4 SECTION 11, T02N, R04E, MDB&M.

COMPLETE AND RETURN THIS FORM BY JULY 1, 1994.

- A. Water is used under: Riparian claim ☒; Pre 1914 right ☒; Other (explain) ☐  
B. Year of first use (Please provide if missing above) 1850  
C. Amount of Use - Enter the amount of water used each month. If monthly and annual use are not known, check the months in which water was used.

Amounts below are: ☐ Gallons ☒ Acre-feet ☐ (other) \_\_\_\_\_

	JAN.	FEB.	MAR.	APR.	MAY	JUNE	JULY	AUG.	SEPT.	OCT.	NOV.	DEC.	TOTAL ANNUAL
1991	1000 AC/Ft					1000 AC-Ft	1000 AC-Ft			1000 AC/Ft	1000 AC/Ft	2000 AC/Ft	7000 AC/Ft year
1992	1000 AC/Ft					/	/			/	/	/	7000 AC/Ft year
1993	1000 AC/Ft					/	/			/	/	/	7000 AC/Ft year

- D. Purpose of Use - Specify number of acres irrigated, stock watered, persons served, etc.  
Irrigation 1000 acres; Stockwatering \_\_\_\_\_; Domestic \_\_\_\_\_  
Other (specify) salt leaching - waterfowl habitat.

- E. Changes in Method of Diversion - Describe any changes in your project since your previous statement was filed. (New pump, enlarged diversion dam, location of diversion, etc.)

None

- F. If part of the water listed in Part C consists of reclaimed or polluted water, please indicate the annual amounts of reclaimed or polluted water in the space below.

None

I declare under penalty of perjury that the information in this report is true to the best of my knowledge and belief.

## GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriate right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

STATEMENT OF WATER DIVERSION AND USE

This statement should be typewritten or legibly written in ink

3063

A. Name of person diverting water Richard Lagomarsini  
Address 399 Seton Hall Ave., Berkeley, Cal 94603

B. Name of body of water at point of diversion Sacramento River  
Tributary to Sacramento River

C. Place of diversion Delta Farms Reclamation Dist 2041  
Delta Farms 1/4 Section Township Range 2041  
Delta Farms County, or locate it on sketch of section grid on reverse side with regard to section lines or prominent local landmarks.

D. Name of works Medford Island

E. Capacity of diversion works 8,000

Capacity of storage reservoir \_\_\_\_\_

Flow quantity of water used each month in gallons or acre-feet

Year	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	Total

If monthly and annual use are not known, check months in which water was used. State extent of use in units, such as acres of each crop irrigated, average number of persons served, number of stock watered, etc. 5720 acres  
See acre Data - 200 Acre flooded

Maximum annual water use in recent years \_\_\_\_\_

Minimum annual water use in recent years \_\_\_\_\_

Type of diversion facility: gravity ☒ pump \_\_\_\_\_

Method of measurement: weir \_\_\_\_\_, flume \_\_\_\_\_, electric power meter \_\_\_\_\_, water meter \_\_\_\_\_, other ☒

F. Purpose of use (what water is being used for) Irrigation

G. General description or location of place of use (use sketch of section grid on reverse side if you desire)  
Medford Island (Reclamation Dist 2041)

H. Year of first use as nearly as known 1859

I. Name of person filing statement Richard Lagomarsini

Position Manager Organization Lagomarsini (Actual)

Address 399 Seton Hall Ave., Berkeley, Cal

I certify that the foregoing statements are true and correct to the best of my knowledge and belief.

Date signed 7-18-67 Signature Richard Lagomarsini
